

The Star of Lakeview

Medically monitored programs with comprehensive treatment options.

Supporting men as they redefine traditional social experiences without substance use.

For men, alcohol use is often a standard component for social settings and recreational activities. The Star of Lakeview Health is designed to mimic such environments so men can retrain their minds and bodies. Here, our clinical programs focus on the social factors of addiction and the unique relational needs of men.

We have created safe, welcoming spaces where men can explore other ways to connect. From our library, to our music room, to the sports-themed bistro, the men in our program learn to enjoy areas and social settings - that are common triggers - without substance use. This helps set them up for long-term success outside of treatment.

Within all of our spaces our male patients are receiving an evidence-based curriculum focused on providing all the necessary tools needed to succeed in life after treatment.

Helping Men Recover curriculum

24/7 medical staff

Masters-level, licensed clinicians

Chronic pain treatment regimens
